Allowable Subject Matter

2. Claims 1-10 are allowed.

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance:

The primary reason for allowance of the claims is the inclusion of at least one first switching electrode disposed between the detective member and the second electrode and facing the detective member and at least one second switching electrode disposed between the detective member and the first switching electrode wherein the second switching electrode comes into contact with the first switching electrode in accordance with displacement of the detective member, and wherein the displacement of the detective member is identified on the basis of a detection of a change in resistance between the first electrode and the second electrode.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 2858

Armstrong (US 20020067241 A1) discloses resistance type sensor comprising detective member 18, and pressure sensitive resistor 30 between first electrode 14 and second electrode 34, and first switching electrode 16 between detective member 18 and second electrode 34. Armstrong lacks second switching electrode disposed between the detective member and the first switching electrode wherein the second switching electrode comes into contact with the first switching electrode in accordance with displacement of the detective member (Fig. 8).

Yanai (US 20040000195 A1) discloses pressure sensor comprising detective member 10, and pressure sensitive resistor 7 between first electrode 5, and second electrode 6 (Fig. 8). Yanai lacks first and second switching electrodes.
